

IMASEN Group Procurement Policy

•Fair Transactions

When selecting suppliers, the Company provides fair and equal opportunities for participation regardless of nationality, company size, or past transaction history.

In addition to quality, price, delivery, technology, development, and sustainability initiatives, we also consider stable supply systems and the continuity of business operations over the medium to long term in order to select suppliers fairly.

•Mutual Growth

Our basic policy is to promote mutual growth with our suppliers through our business relationships.

We position our suppliers as important partners, and under a foundation of trust and cooperation, we share challenges related to development, quality, and stable supply.

By maintaining a collaborative system that leverages the strengths of both parties, we aim to achieve mutual growth.

•Environmental Responsibility

We recognize it as our fundamental responsibility to give the utmost consideration to the preservation of the global environment in all our corporate activities.

With the same commitment in our purchasing activities, we promote green procurement by giving priority to sourcing materials with reduced environmental impact.

In cooperation with our suppliers, we strive to reduce environmental burdens and build a sustainable supply chain.

•Compliance and Confidentiality

We position compliance as a fundamental principle of our corporate conduct and strictly adhere to social norms and all applicable laws and regulations.

In addition, we properly handle technical, development, and other confidential information provided by our suppliers under strict management.

We are fully committed to preventing information leakage and ensuring the highest level of information security.
